

Oracle Applications Services

Ivitesse (IVT) Oracle Applications practice covers wide range of industries like engineer-to-order and make-to-order manufacturing, automotive, electronics, batch and continuous process, Consumer goods, banking, financial services and insurance.

Customizing and extending Oracle Applications forms an important segment of our Oracle Practice. Our extensions have helped customers disburse payments faster, integrate legacy applications, extend Oracle Applications to a mobile sales force, and enhance business decision making using OLAP tools like Financial Analyzer. IVT expertise is built on industry proven Oracle implementation methodologies which ensure easy monitoring of projects and on-time delivery.

Expertise Oracle Applications

IVT offers a comprehensive portfolio of services to Oracle Applications customers using different versions of Oracle EBS products. Our services cover the entire Oracle implementation spectrum — consulting, implementation and post-implementation — beginning with assessment services and extending to:

- Gap analysis, technical solutions design, implementation, rollout and support
- Implementing advanced solutions for supply chain, CRM, procurement
- Upgrade services
- Integrating the Oracle e-Business suite with other products, including Siebel and third party applications like: Vertex, RightFax, JetForms, CertiChex, mobile devices, and RFID solutions,
- Post Implementation Support

Implementation

IVT offers end-to-end support for Oracle implementation:

- Solution Strategy
- Process mapping and gap analysis
- Installation and set-up
- Customization
- Integration
- Data Conversion
- Key User training

Integration Services

IVT helps clients make sure that they are getting the maximum value from their Oracle Applications investments with a suite of services for assessing current Oracle implementations and managing migrations and upgrades. IVT can also handle “bolt-on” application development when specialized needs call for custom applications.
